RAIN WATER HARVESTING

RAAK College of Engineering and Technology has unveiled a Rain water harvesting system with a dedication to support the campus and the city. Rain water harvesting is available at different locations in our campus; the rain water run-off is recharged into the ground water.

SEWAGE WATER PROCESSING PLANT

In our Campus the treated wastewater is reused for various purposes, including:

Toilet Flushing: Using treated water for flushing toilets helps conserve freshwater resources.

Gardening and Agriculture: Reclaimed water can be used for irrigation, maintaining green spaces, and supporting campus gardens.

Landscape Maintenance: Landscaping and maintaining green areas benefit from recycled water with low physical contact.
